

Pressure Reducing Valve and Upstream Pressure Control with non-Return Feature

► Simple, Reliable and Accurate

- Completely Automatic Operation
- Easy Adjustment and Maintenance
- Quality Approved Materials
- World Wide Support

► CLA-VAL SERIES 90 Main Function

The CLA-VAL SERIES 90 reduces a higher inlet pressure to a constant downstream pressure (Pressure Reducing Control) regardless of changing flow rate and/or varying inlet pressure.

► CLA-VAL 92-02 Typical Application

The CLA-VAL 92-02 is designed to reduce a high pressure (P_1) and to sustain a minimum upstream pressure.

Reducing pressure for a downstream distribution network and sustaining a minimum upstream pressure in a high pressure main and/or for an upstream distribution network is a typical application.

A Check Valve is added when a pressure reversal occurs ($P_2 > P_1$) to prevent backflow through the valve.

Make your valve even Better!

LFS Option?	<u>Control</u> Low flows or night flows
KO Option?	<u>Extend</u> valve life with Anti-Cavitation trim
KG1 Option?	<u>Use</u> stem cleaning for harsh water
Maintenance?	<u>Check</u> on periodic maintenance
Environment?	<u>Adapt</u> to high temperatures or frost risk
Security?	<u>Add</u> hydraulic safety back-up to your valve
Protection?	<u>Remove</u> excessive system overpressures
Corrosion?	<u>Protect</u> your valve with upgraded materials
